## Bevan Begins Biggest Housing Drive

# WAR PLANS SWITCH TO HOUSE BUILDING

BY OUR INDUSTRIAL CORRESPONDENT

**BRITAIN'S** great industrial resources, geared for war production, are being switched to the nation's biggest peace problem—housing. This change-over begins tomorrow. And from now on the Order of the Day is Full Speed Ahead. The Government is giving A1 priority to the pressing need of building homes; and Mr. Aneurin Bevan, the Minister of Health, has asked local authorities to have the first permanent houses under construction by the autumn.

Mr. ANEURIN BEVAN,  
Minister of Health

### Start Them By Autumn!

## Councils Told To Get Busy

**MR. BEVAN** launched the great drive for homes yesterday by sending to all local authorities in England and Wales a special message urging them to get the first instalment of permanent houses started before the autumn.

The message adds that, if any council is not likely to be in a position to apply for authority to let contracts for the first batch of post-war houses by September 30, the Minister should be informed at once of the reasons.

The previous condition that traders should not be invited into roads and sewers are complete, is cancelled.

Where progress can be speeded up by contracting for the construction of roads and sewers at the same time as the building of the houses, this should be done.

As soon as satisfactory prices have been obtained for the first instalment of the post-war programme, Mr. Bevan will be ready to consider proposals for a further instalment.

Each authority should make arrangements to secure a continuous flow of houses on the basis of a programme covering the development of the building programme.

Steps should be taken now to ensure that this programme is in a position to start at once and proceed on the basis of the previous condition that only the first instalment of the programme is cancelled.

Of the prospective houses they are not yet been fixed. They will be related to the subsidy which the Government will provide, but that cannot be decided until the autumn.

**FOOD FROM THE FIELDS**  
In many parts of the country, harvest has begun, and pig and poultry keepers will be able to supplement their allowances of meat by slaughtering their own flocks and herds.

**U.S. Claim Pacific Islands**  
From WILLIAM HARGREAVE, Reuters Correspondent  
Washington, Sunday.

**COMPLETE** American strategic domination of the Pacific, and the retention after the war of U.S. bases on Allied islands, were used in categorical language by the House of Representatives' Naval Affairs Committee in a report today.

The committee, which toured 21,000 miles of the Pacific, believed that the U.S. should dominate the Pacific.

Mr. Bevan's great drive—plans for which were drawn up after an exhaustive survey in the past fortnight by a team of Ministers under the chairmanship of Mr. Arthur Greenwood, Lord Privy Seal—applies to the whole of Britain.

Scotland will have its own scheme with Mr. George Buchanan, Under-Secretary for Scotland, directing the plan, under the supervision of Mr. Joe Westwood, Secretary of State for Scotland.

The permanent houses will be a trickle at first. Then as the great national drive, backed by hundreds of thousands of factory workers as well as builders, gets under way, the trickle will grow to a torrent, and the most urgent of Britain's post-war problems will be nearly solved.

So far local authorities have been authorised to get tenders for 37,000 houses—and that number represents the first instalment of the permanent homes programme.

At present sites, complete with roads and sewers, are developed for 47,000 houses.

The Greenwood-Bevan Plan is far reaching. Its effect on industry is immediate. That is what it means:

**MUNICIPAL FACTORIES** will be switched over, complete with their plant and staffs and workers, to produce:

Doors, windows, stairways, baths, plumbing sets, floors, ceilings and furnishings.

**OTHER MUNITION FACTORIES**, including those that have been making aircraft parts, will change to the mass production of:

Fitted furniture, gas stoves, electric stoves, refrigerators and whole-home electric lighting units.

**BRICKWORKS** and **CEMENT WORKS** will be given mass orders, at fixed prices, on long-term contracts lasting for several years, to produce bricks by the million, and cement by the hundred thousand tons.

**LOCAL COUNCILS** will be told to mobilise all the building labour in their areas, either under their own control or in teams under local employers and to get on with the job.

**COUNCILS** will also be empowered to secure immediately labour necessary for their areas. The procedure for compellingly acquiring land will be cut down to a few days.

**ALL DEBTS** in getting plans approved by seven Government Departments will be cut out.

**MR. BEVAN** has been put in charge of the International Commission on War Crimes.

Professor James H. Dugan, who headed the German expert government, has been appointed to the position of high treason before a civil court in Oslo tomorrow.

**Quitting**  
**On Trial Tomorrow**  
Victim Gordon, who headed the German expert government, has been appointed to the position of high treason before a civil court in Oslo tomorrow.

**THE MINISTRY OF TOWN AND COUNTRY PLANNING** (under Mr. Lewis Silkin) will fix the sites.

**THE MINISTRY OF SUPPLY** (under Mr. John Wilmot) will be the main purveyor of all the building materials needed, will estimate needs and find the money and how they can be supplied.

**THE MINISTRY OF WORKS** (under Mr. George Tomlinson), in addition to completing the prefabricated house programme already in hand, will deal with temporary construction and construction of new houses.

**THE MINISTRY OF HEALTH** (under Mr. Aneurin Bevan) will be the main purveyor of all the building materials needed, will estimate needs and find the money and how they can be supplied.

**THE MINISTRY OF TOWN AND COUNTRY PLANNING** (under Mr. Lewis Silkin) will fix the sites.

**THE MINISTRY OF WORKS** (under Mr. George Tomlinson), in addition to completing the prefabricated house programme already in hand, will deal with temporary construction and construction of new houses.

From DAVID FRIEDMAN, Reuters' Correspondent

**THE** strangest of all military surrenders in history must be signed this week-end if the victory won by the Allies in the Pacific is not to be allowed to deteriorate into a farce by what appears to be persistent procrastination by a beaten enemy.

The Japanese so far have shown that they either do not understand the true meaning of surrender, or else do not wish to.

It has taken the Japanese four days, and only after Gen. MacArthur had sent them a final warning in unmistakable language, to announce their plans to fly emissaries 1,500 miles to Manila to sign the surrender documents.

The Japanese envoys, Tokyo now says, will take off tonight "weather permitting"—and will arrive at the island of Okinawa at 5.30 a.m. B.S.T. tomorrow.

From the time they will be flown to Manila in an American plane, but since they will not be down until night, the meeting with Gen. MacArthur must be postponed until Monday morning.

**"DOUBLE-DEALING"**  
Responsible American opinion is showing impatience at the delaying attitude of the Japanese. The "New York Times" says: "It is easy to understand the Japanese. But we have suffered so much from Japanese double-dealing, since surrender flags and proclamations, while plans were made and even sent to us below the belt, that it is difficult to view calmly the present antics of the Emperor and his advisers."

In the language that New Yorkers understand best, "P.M." comments: "Japan is still playing us for a bunch of suckers. It's stalling and telling us that they didn't want the war, but they were forced to fight it. It's a double-crossing of the East Asia."

But the Americans have the final remedy. It was disclosed today that a master plan is ready to be carried out by Gen. MacArthur to return Japan to the status of an agricultural nation.

One day's work of the Japanese is not to be rebuilt. The same day's work of the Japanese is not to be rebuilt. The same day's work of the Japanese is not to be rebuilt.

**PLANES ATTACKED**  
Today's news that Gen. Hata had landed at the Manchurian city of Harbin, a radio message was sent to the Japanese command, telling that the planes were there to pick up the Japanese command.

**TEST-TUBE DIVORCE**  
Chicago, Saturday.  
On the grounds that his wife had a "test-tube baby" without his consent while he was away on overseas service, Pete James, King of Chicago, today filed suit for divorce against her.

**ARMY COUP LIKELY IN SPAIN**  
Switzerland expects a coup d'etat by the Spanish Army in favour of Don Juan, the claimant to the Spanish throne, to take place shortly.

**TIMOR JAPS SURRENDER**  
The Japanese forces on the island of Timor in East Java have given themselves up to the British. The British have taken the island, said Lisbon Radio last night.

**At 22 She Was Death Camp Jailer**  
From ROBERT BIGO, Reuters' Correspondent  
Paris, Saturday.

**MARIA ANNA MINGES**, a blonde, Germanic, stood today in a small bare room to face interrogation by a French Army officer.

She is among 600 German women accused of war crimes, now held in the French zone of occupation in Germany pending their transfer to France for trial.

**Washington Warns Bulgaria**  
Mr. James F. Byrnes, Secretary of State, has notified the Communist-dominated Government of Bulgaria that the United States does not regard it as adequately representative of the democratic elements in the country.

## It Was Their VJ-Day, Too

## 6,000 Britons In Shanghai Freed

**THE** hundreds of British, American and Dutch subjects, interned by the Japs for years in Shanghai, were freed on VJ-Day. This dramatic news came yesterday in a telegram from the Foreign Office from the Swiss Charge d'Affaires in Shanghai.

**Coupons Surprise**  
**Petrol Mystery**  
**MOTORISTS** collecting their new petrol coupons yesterday were surprised to find in addition to vouchers for five gallons a month for the September-November quarter, further vouchers of six gallons a month for the December-February period.

**They** were aware of the increase of 25 per cent. on the present ration (to five gallons) in the next quarter, but the Government have issued no notice concerning the December-February ration.

**Inquiries** were made at the Ministry of Fuel and Power to ascertain if the extra vouchers meant another increase.

**But** the Ministry say "No. An official said last night: 'Nothing has been decided about any ration beyond the September-November period.'

**The** books were printed some months ago and no notice should be taken of the December-Petrol coupons."

**See Page Three: Minister's Hint of More Petrol.**

## Jap Chief On War 'Gains'

**THERE** is still one Japanese who thinks the war has been worth while, even if it has resulted in total defeat. He is Mamoru Shigemitsu, Foreign Minister in the new Cabinet appointed by General Prince Higashikuni.

**In** a statement quoted by the Japanese Agency yesterday, he said: "The racial spirit has been reborn by peaceful though strenuous efforts. They have been the great results of the war."

**Tamon** Marea, Japan's new Education Minister, said the scientific progress in Japan was aimed at trying to counter the atom bomb, but at the reconstruction of a new Japan—Renter.

## BRITISH IN OSLO PARADE

**One** thousand British soldiers, sailors and airmen took part in today's official victory parade through the streets of Oslo, as well as 1,000 American and 1,000 Russian troops, reports Oslo Radio.

## WEATHER FORECAST

**General** increase mainly fair but rather cloudy at first, especially in Eastern areas.

**Further** outlook: unsettled; mainly cloudy.

# I Tour Berlin's Petticoat Lane

## BLACKEST MARKET OF ALL!

### Cigarettes—£2 10s.

### For Twenty

By EVADNE PRICE, "The People's" Correspondent in Germany

SARAH LEHMAN came slowly and painfully to consciousness. Painfully because her knee had gone stiff while she slept. The knee was a legacy of that frightening night in 1944 when the RAF had made Berlin a living hell.

Sarah had been buried alive for 15 hours. Besides the fractured leg, she had had concussion and was from hospital three months now. Today was her twenty-fifth birthday.

She didn't look it, in spite of all she had gone through. She was fair-headed, blue-eyed and pretty. Carefully she washed and dressed herself in her only summer frock, a faded floral affair. Over it she wore a worn-out blue jacket.

She had no stockings and her sandals were nearly worn black. She hoped the shoes wouldn't cut off for the Black Market in the Tiergarten was a long way off and she had to walk it.

But she must sell her wedding ring—her money or anything to eat," I said, surprised.

Then you're not German?"

"No," Sarah was Polish. African-born of a German mother and an English father, but married to a German. She had come to Berlin from South Africa on holiday in 1938 and been caught up in the war.

Her relatives had turned on her then, but she had escaped a concentration camp, marrying a German boy who loved her, and they had thereby forced her into a situation.

Nazi women had supervised her for her life. She had been a young husband was swallowed up in the army and killed in the war.

The Black Market with Sarah to sell her wedding ring.

The Black Market is her sell her wedding ring.

Cigarettes fetch £2 10s. for 20, but she had seen them sell at 10s. for 50 cigarettes. No one would buy it. Don't ask me why, I wouldn't know.

Sarah sold her ring to a Russian for 212 lbs. and three times of meat ration. The same Russian had sold her a tin of condensed milk for 212 lbs. and three times of meat ration.

Well, it isn't now. Sarah lives in a small kitchenette of a flat, but she has a bed with one thin blanket. No floor covering. No windows, no light, no heat, no running water.

When her leg is better she is going to the British and asking them for a job in a kitchen.

"I'll be warm there," Sarah says. "I'll probably get one meal a day. That'll see me through this winter, and perhaps some day I'll get home to Africa and my father."

Further developments in RADIO and TELEVISION—the whole new field of ELECTRONICS—will always mean

From the closing years of the last century the long history of CONCOR is one of unceasing development.

Radio equipment for the last war, then the progress in peace which made it one of the largest producers of radio and television.

● The Guards are up in arms, defending the B.L.A. against the "scurrilous myth of Fraternisation."

● "Shut the mouths of the gossips," they say, "and credit us with some sense of honour and discipline."

AND  
GLAD  
OF IT!

# Angry Guards Attack "Fratting Stories"

A SCURRILOUS myth is being fostered in Britain today. In blunt terms, the wives and mothers, the sisters and the sweethearts of the men who form the British Army of Occupation are being asked to believe that these men—the great majority of them—are spending most of their time flirting with German girls, taking them out for walks into the woods—and the rest left to the imagination.

"No one wishes to pretend that fraternisation is not taking place. We do not deny that the B.L.A. is composed of men who lack the normal human instincts, who are totally indifferent to the appeal of feminine beauty. We are not an army of monks."

So says the Guards' newspaper, "The News Guardian," a British paper published at Bad Godesberg, which claims in this matter to be the voice of the appeal of feminine beauty. We are not an army of monks."

But we deny with all the vigour at our command, and with some bitterness, too, the fact that 80 per cent, 70 per cent, yes, even 10 per cent, of the men of the B.L.A. devote such hours as they have to the systematic seduction of every available German girl they can put their hands on."

"We demand an end to this kind of thing. We demand that the B.L.A. should be a force of discipline, some ability to control our emotions."

"If we could do it on the Norwood beach, we should be cheered for it—why should it be assumed so easily that we have lost that ability now?"

"We demand an end to this kind of thing. We demand that the B.L.A. should be a force of discipline, some ability to control our emotions."

"If we could do it on the Norwood beach, we should be cheered for it—why should it be assumed so easily that we have lost that ability now?"

# Police Were Unfair, Says Magistrate

A LUTON milk roundsman

applied for a licence for a new motor-car in March last and was asked by the police to take his present van round for inspection.

As a result, the roundsman Jack Palmer, aged forty, of Stockington, Luton, who had been in the van since 1938, was asked yesterday for failing to maintain his motor-car brakes in good order.

The magistrate dismissed the case and criticised the police for bringing the prosecution.

Mr. J. Mobley, the chairman, said that the roundsman should take place on the owner's premises. It was not fair to ask a person to take a vehicle on to a public road, and then prosecute him in respect of it.

The deputy chief constable, Mr. A. Bear, said that the owner applied the examination could be made at his premises.

The deputy chief constable, Mr. A. Bear, said that the owner applied the examination could be made at his premises.

# Today's Royal Drive: A Warning

IN connection with the Royal Drive to St. Paul's today for the Harvest Thanksgiving Service, the Crown equity asks particularly that the public will refrain from throwing paper streamers or any torn paper from the windows of motor-cars on the route because of the danger of frightening the horses in the procession.

The "People's" understands that the Government is making frantic appeals for help to all and sundry.

The commonsense plan, as it seems to the plain man and woman, would be to employ every available soldier, sailor or airman now "kicking his heels" and awaiting "demob."

The "People's" understands that the Government is making frantic appeals for help to all and sundry.
